

# ***Triage*** **LOGISTICS**

# YOUR GATEWAY INTO **CANADA** FROM **MEXICO** AND THE **USA**

As a Canadian owned and operated transportation logistics enterprise, our expertise is focused on trucking your valuable cargo across Mexican, U.S. and Canadian borders. At Triage Logistics, each member of our team has a specific area of expertise and collectively, we come together to win each and every race for our clients.

We have decades-long relationships with our partner carriers and a strong track record of ensuring the highest performance on each shipment we deliver. Our name, Triage Logistics, is derived from the emergency, detailed and personalized approach that we take with each shipment placed in our care.

## CROSS BORDER LTL & TL

We specialize in NAFTA markets (North American Free Trade Agreement). The Triage team is highly skilled in all aspects of crossing borders seamlessly and working closely with tried and true partner carriers ideally suited for each lane and commodity being delivered. Whether you're shipping dry goods or require temperature controlled service, appointment deliveries are the norm and our performance metrics are industry leading.

## EXCLUSIVE USE

The more demanding your requirements, the more we shine. We are skilled at shipping the out of the ordinary and the near impossible. Often that includes dedicating a truck for your freight alone. Anything from a cargo van to a 53' tractor trailer can be selected to best suit getting your shipment direct to its final destination. Single or team drivers... we make whatever you need to happen, happen now.

## INTERSTATE FREIGHT

Although our core focus is moving LTL and Truckload freight across NAFTA borders, our customers rely on us for many additional services as well. Utilizing leading regional carriers for each geographical area, we can literally move any LTL or Truckload shipment between any state.

## EXPEDITED SERVICE

When timing is critical, the Triage Logistics team is highly reactive in addressing your expedited requirements NOW. Expedited service can allocate the exact equipment you need to bypass any delays or re-handling and provide a direct door-to-door solution.

## WHITEGLOVE SPECIALISTS

We have the specialized equipment, personnel and training to handle the pick-up, transport and team delivery of everything from laboratory equipment, museum displays, fine art and MRI machines. On-site cranes, rigging, installations and debris removal - whatever the project size, we give your delicate shipment our undivided attention.

# THE TRIAGE LOGISTICS TEAM HAS **COMMODITY** **SPECIFIC** **EXPERTISE**

## GENERAL FREIGHT

Raw materials or finished goods, food packaging or building materials, automotive parts or knock down furniture... it's all in a day's work at Triage Logistics. Through our extensive partner network, we ship every commodity, everywhere, throughout Canada, USA and Mexico. Although we are best known for loads unusual in shape, size and weight, we are happy to ship your straight up skids of freight as well. General freight, or high value goods... you name it and we truck it!

## HIGH VALUE & SPECIALIZED

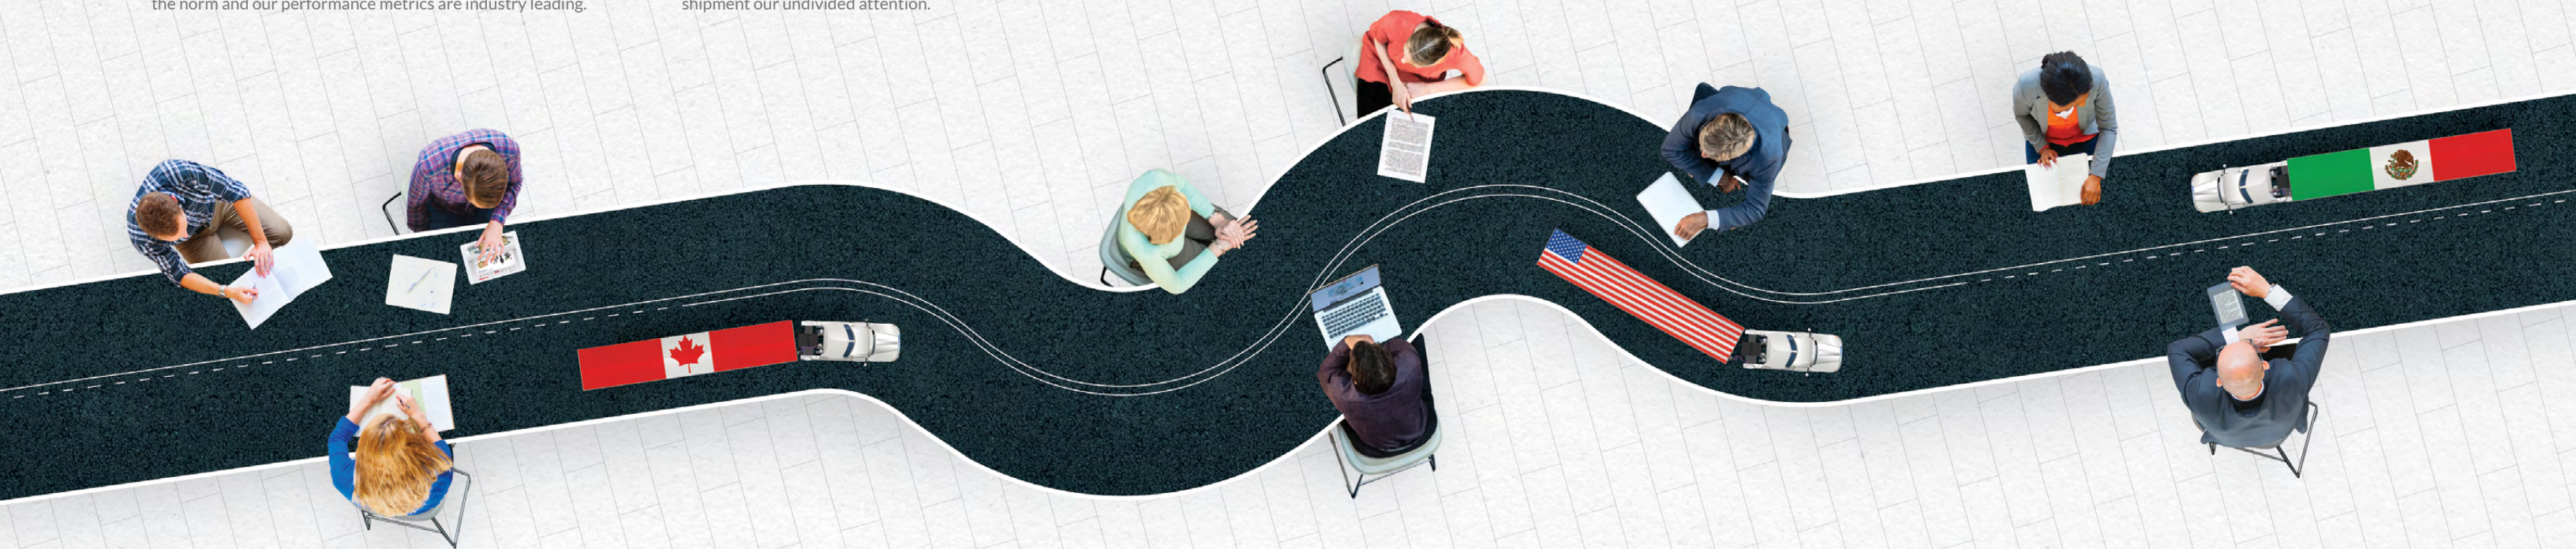

The Triage management team has a rich history in the delivery of valuable, highly fragile cargo. Our ability to manage your project, push out critical shipment data and ensure on time performance, separates us from other freight management companies. We transport machinery, oversize loads and electrical components like circuit breakers, voltage regulators, transmitters and repeaters. If you require specialized handling, trust Triage to ship with care and get it there exactly as promised.

## ARTS & ENTERTAINMENT

If we can move an entire town (and we have), then we can move most anything. We enjoy the challenge involved with special projects and tight timelines. We excel at the transportation of stages and equipment for movies, television, live theatre and performances that move on pre-determined schedules throughout North America. Similar to our white glove service, we look after every detail and coordinate with each venue to ensure all needs are met.

## MEDICAL & HEALTHCARE

Proper packaging and protection are critical components in the effective movement of your valuable medical equipment and healthcare products. We use specialized teams that are highly experienced in these moves so you can count on us to and from any destination in North America. Whether you're shipping Ultrasound equipment and CT Scans or require temperature controlled transport of pharmaceuticals, you can trust Triage to deliver again and again.

Since our inception, we have stayed in tune with where the logistics industry is now and where it is going. We keep abreast of trends and changes to global supply chains by being active participants in the following associations.
